Work Experience

- **Software Engineer Intern (Full-Time)** at REFS Labs (refs.me) | Remote | Jan 2026-Sept 2026
Early-stage startup, seven-person team, weekly production releases, fast-changing requirements
 - Owned features end-to-end across the full stack: frontend features, backend services, authentication flows, third-party integrations, and internal tooling
 - Redesigned feature flag evaluation to fix server-side performance issues as traffic grew
 - Built a data import pipeline with provider failover, retries, and deduplication to scale the catalog cleanly
 - Connected imports to internal ops tools with live progress and notifications so non-engineers could run them
 - Set up GA4 and Google Tag Manager analytics, conversion funnels, and SEO (JSON-LD, sitemaps, Open Graph)
 - **Director of Finance** at Delta Tau Delta Fraternity | Eugene, OR | Sept 2022-May 2023
 - Led financial management for an organization with a \$450K annual budget, overseeing budget creation and financial planning across multiple committees
 - Streamlined monthly dues collection for 100+ members and managed 30+ chapter house subleases while keeping records accurate and current
-

Projects

- **JoshOS** | joshmuzi.com | github.com/Josh-Muzi/josh-os/ | 2026
Personal site and game platform: a Windows 95-style desktop that hosts two AI-powered games
 - Built a browser-based desktop in Next.js and TypeScript with a custom window manager, draggable icons, and a separate mobile layout
 - Shipped two Claude API games where code owns every rule and the model supplies creativity: an infinite AI-generated fish collection and a derby racing betting game
 - Wrote a deterministic race simulation that prices betting odds with 200 Monte Carlo runs per race
 - Built the AI routes for public traffic with per-IP rate limits, daily budgets, Redis caching, and offline fallbacks
 - Produced the game art with AI image tools and wrote the canvas pipeline to crop, quantize, tint, and animate sprites
-

Skills

- **Languages:** TypeScript, JavaScript, Python, C++, SQL, Shell scripting
 - **Frontend:** React, Next.js (App Router), Tailwind CSS, HTML/CSS
 - **Backend & Data:** Node.js, Convex, REST APIs, MongoDB, Redis, OAuth 2.0 and auth integration, webhooks
 - **AI & Automation:** Claude API integration, structured outputs validated with Zod, prompt design, cost controls (rate limits and daily budgets), AI-assisted asset generation
 - **Tools & Practices:** GitHub, Vercel, CI and pre-push pipelines, Biome, pnpm, Linux, Agile, code review
-

Education

- **University of Oregon**, Eugene, OR Graduated 2025
 - B.S. Computer Science
 - Business & Entrepreneurship Minor
